PROFESSIONAL SUMMARY

Systems Engineer with over 6 years of experience building and deploying web and mobile applications for banking, fintech, and automotive clients. Specialized in React and Node.js, with a solid foundation in Java/Spring Boot backend development. Experienced in Linux environments, Docker containers, Kubernetes, Git/GitHub, and cloud platforms such as AWS. Knowledgeable in infrastructure as code using Terraform and CloudFormation, AWS service management, and DevOps practices focused on automation and continuous delivery. Proven ability to collaborate across development and infrastructure teams to ensure scalable, secure, and highly available applications.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Angular, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express, NestJS, Java, Spring Boot, Laravel, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Oracle, SQL Server

Mobile: React Native, Flutter, Ionic

DevOps and Tools: Knowledge of AWS Cloud (EC2, Lambda, RDS, VPC), Infrastructure as Code (Terraform and CloudFormation), Azure DevOps, Linux, Docker, Kubernetes, Git, and GitHub.

Practices: Agile/Scrum, code review, automated testing, process automation

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer

Jan 2025 – May 2026

DEVINTECH — clients: Grupo Q / CrediQ, Localiza S.A. de C.V.

- Designed, developed, and shipped biometric fingerprint authentication in Grupo Q's main mobile app, improving security for hundreds of users.
- Built the end-to-end digital vehicle-quote request flow in the negotiations app, letting users complete the full quotation process online.
- Developed a metrics/history plugin tracking used-vehicle sales performance per salesperson across the platform.
- Added new features to CXPS, Localiza's GPS fleet-tracking system, and delivered multiple smaller enhancements across web and mobile products.
- I managed and deployed applications on Linux servers.
- I created and maintained Docker containers for development and production environments.
- I used Git and GitHub for version control and collaborative workflows.
- I participated in continuous integration and continuous deployment (CI/CD) processes.

Full-Stack Developer

May 2024 – Dec 2024

LEAGUE (apparel manufacturer for U.S. universities) — Information Technology

- Developed the government-mandated electronic invoicing system, strengthening the company's finance operations and ensuring tax compliance.
- Built a web app for employee ID-badge printing serving 800 employees.
- Delivered internal tools and dashboards to measure business metrics and automate processes, using Node.js, React, and Laravel on SQL Server.
- I deployed and maintained applications on Kubernetes clusters.
- I monitored and supported services deployed on Linux infrastructure.

Software Developer (Analyst Programmer)

Nov 2023 – Mar 2024

Óptimas Consultores — client: Banco Agrícola (banking)

- Improved backend query response times for an application serving thousands of banking users, by migrating the database from Oracle 11g to 12c.
- Executed Oracle Forms migration (6i to 12.2) ensuring zero data loss for a major regional bank.

Network & Technical Support Specialist

Aug 2021 – Apr 2023

WebHelp (Claro account) — Telecommunications

- I maintained the Data Center network, configuring VLANs, subnets, and IT infrastructure firewalls (directly based on cloud networking concepts such as VPCs, subnets, and Security Groups), ensuring reliable connectivity for business operations.

Software Developer (Analyst Programmer)

Sep 2020 – Mar 2021

Xuret — Information Technology

- Redesigned web application interfaces, improving UX and benefiting the client's customer base.
- Enhanced a third-party company's sales-process software, adding features and improvements using Java, Node.js, MySQL, and Oracle.

SELECTED PROJECTS & LIVE DEMOS

Full portfolio of 15+ deployed applications (React, Node.js, MERN, Angular). Highlights:

- MERN Patient Manager (APV) — full CRUD app with auth: demo-mern-apv.vercel.app
 - Real-Estate Listing Platform: demo-app-realstate.netlify.app
 - Meeti Events App: demo-app-meeti.netlify.app
 - Crypto Price Quoter (React): demo-app-cotizadordcripto.netlify.app
 - Food Delivery App: demo-app-delivery.netlify.app
 - Shopping Cart / E-commerce: demo-app-carrito.netlify.app
-

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Systems Engineering 2023

Universidad de El Salvador

AI Expert Engineer — Specialization (in progress) 2025 – 2026

Online

Professional Certifications

- MongoDB Developer Certification (2019)
- Digital Marketing & Web Analytics — Neetwork Business School, Spain (2022)
- WordPress, E-commerce & Conversion Funnels — Neetwork Business School, Spain (2020)

LANGUAGES

Spanish — Native English — Professional working proficiency (reading & writing strong)
